PO9	Encourages a commitment to continuous learning, essential for staying updated with evolving financial regulations, markets, and technologies throughout one's career.
PO10	Focuses on financial management skills, equipping students with the knowledge. required for effective financial planning, budgeting, and management within various organizational contexts.

B. SC. ZOOLOGY

PO1	Students gain knowledge and skill in the fundamentals of animal sciences, understands the complex interactions among various living organisms.
PO2	Analyse complex interactions among the various animals of different phyla, their distribution and their relationship with the environment.
PO3	Apply the knowledge of internal structure of cell, its functions in control of various metabolic functions of organisms.
PO4	Understands the complex evolutionary processes and behaviour of animals.
PO5	Correlates the physiological processes of animals and relationship of organ systems.
PO6	Understanding of environmental conservation processes and its importance, pollution control and biodiversity and protection of endangered species.
PO7	Gain knowledge of small-scale industries like sericulture, fish farming, bee keeping, aquaculture, animal husbandry, poultry farm.
PO8	Understands about various concepts of genetics and its importance in human health.
PO9	Apply ethical principles and commit to professional ethics and responsibilities in delivering his duties.
PO10	Apply the knowledge and understanding of Zoology to one's own life and work.
PO11	Develops empathy and love towards the animals

B. SC BOTANY

PO1	Critical Thinking: Take informed actions after identifying the assumptions that frame our thinking and actions, accurate and valid looking at intellectual, organizational goals.
PO2	Effective Communication: To the world by connecting people, ideas, books, media and technology using botanical terms.
PO3	Social Interaction: Understand and solve problems of relevance to society to meet the specified needs using the knowledge, skills and attitudes acquired through the field of plant science.
PO4	Effective Citizenship: Demonstrate empathetic social concern and equity centred national development, and the ability to act with an informed awareness of issues and participate in civic life through volunteering.
PO5	Modern tool Usage: To have learned the effective usage of modern tools in scientific research and communication
PO6	Ethical Behaviour: To behave as a learned person in places of scientific and societal relevance
PO7	Environment and Sustainability: Understand the issues of environmental context and sustainable development.
PO8	Individual and teamwork: To be in a team as a contributor for the common goal in dealing with societal issues
PO9	Self-directed and Life-long Learning: Acquire the ability to engage in independent and lifelong learning in the broadest context of socio-technological change
PO10	Finance & Management: To have acquired the skills of managing financial and operational requirements of the project

B. SC PSYCHOLOGY

PO1	Critical thinking: take informed actions after identifying the assumptions that frame our thinking and actions, checking out the degree to which these assumptions are accurate and valid and looking at our decisions from different perspectives.
PO2	Problem solving: understand and solve problems of relevance to society to meet the specified needs using the knowledge, skills & attitudes that acquired from humanities /sciences/mathematics /social sciences.
PO3	Effective communication: speak, read, write and listen clearly in person and through electronic media in English and in one Indian language, and making meaning of the world by connecting people, ideas, books, media & technology.
PO4	Effective citizenship: demonstrate empathetic social concern & equity centered national development, and the ability to act with an informed awareness of issues and participate in civic life through volunteering.
PO5	Environment and sustainable development: to sensitize students regarding the need to protect and conserve environment and ecology, thus encouraging them to be agents of social change and sustainable development.
PO6	Self-directed & lifelong learning: acquire the ability to engage in independent & lifelong learning in the broadest context socio-technological changes.
PO7	Individual & teamwork: to function effectively as an individual, as a member or leader in diverse teams and in multi-disciplinary global scope.
PO8	Social responsibility: to enlighten students as social beings to involve in debates, discussions etc. mediating disagreements and coming up with logical conclusions

B. SC FOOD TECHNOLOGY

PO1	Core Domain and Knowledge- They will be able to demonstrate knowledge of Food Chemistry, Food Microbiology, Food Science and Food Engineering
PO2	Critical thinking and analysis- Graduates can apply scientific methods and principles from general chemistry, biology, physics, and mathematics to food science problems.
PO3	Investigation of problems- They will be able to focus on the conditions including sanitation practices, principles involving food preservation and process, and important pathogens and spoilage microorganism in food and importance of safe processed nutritious food.
PO4	Modern tool usage- They will demonstrate an ability to use modern tools and equipment in food processing.
PO5	Societal concern- They will be able to understand the impact of technological solutions on society and will be aware of contemporary issues.
PO6	Environment and Sustainability- The students will be able to focus on sustainability and environmental issues by implementing a production system requiring less energy and water consumption, adding value to food products and food waste (recovery and valorisation) and green active and intelligent packing and storage system.
PO7	Ethics and values- They will demonstrate knowledge of professional and ethical responsibilities.
PO8	Individual and teamwork - Students can function effectively as an individual and as a member for leaders in diverse team and in Multidisciplinary settings.
PO9	Effective Communication- Students will be able to communicate clear and concise technical presentations and data, read for content and quality of literature in the field and write clear and concise technical reports.
PO10	Lifelong learning- Graduates will be able to think independently to solve problems, participate in ongoing voluntary and self-motivated pursuits that supplements food science knowledge.

M.COM (FINANCE)

PO1	understand the importance of analytical thinking in both business & financial decision-making, enabling students to assess complex financial & business situations and make informed choices.
PO2	Emphasizes clear communication of organizational information, as effective communication is crucial in conveying complex data to stakeholders and clients.
PO3	Recognizes the importance of interpersonal skills in financial roles, fostering the ability to navigate professional relationships and collaborate within a financial context.
PO4	Encourages an understanding of financial responsibility and ethical behaviour within the broader context of societal and economic impact, aligning with good financial citizenship.
PO5	Focuses on leveraging modern financial tools and technologies to enhance efficiency and accuracy in financial analysis and decision-making.
PO6	Cultivates ethical conduct in business practices, emphasizing the importance of integrity and compliance with ethical standards in financial transactions and reporting.
PO7	Considers the financial impact of environmental and sustainable practices, preparing students to address these issues in financial planning and decision-making through modern techniques.
PO8	Recognizes the collaborative nature of many roles, developing both individual and teamwork skills crucial for success in the finance industry.
PO9	Encourages a commitment to continuous learning, essential for staying updated with evolving financial regulations, markets, and technologies throughout one's career.
PO10	Focuses on financial management skills, equipping students with the knowledge required for effective financial planning, budgeting, and management within various organizational contexts.

M. SC. BOTANY

PO1	Critical thinking and scientific behaviour: Frame students' thinking and actions in such way to check out the degree to which the assumptions are accurate and valid with a research mind, and looking at their ideas and decisions (intellectual, organizational, and personal) from different perspectives
PO2	Research aptitude: Enhanced observations kindle research aptitude which ultimately lead to additions to the existing knowledge base.
PO3	Effective Scientific Communication: Read, write, listen and disseminate plant science with research knowledge, in person and through scientific platforms and journals.
PO4	Problem Solving: Understand and solve the problems with reference to Nature and society to meet the specified needs using the knowledge, skills and attitudes acquired
PO5	Effective Citizenship: Demonstrate empathetic environmental and social concern for equity centered global development and develop the ability to act with an informed awareness of issues and participate in civic life through volunteering.
PO6	Environment and Sustainability: Understand the issues of environmental contexts and sustainable development at global level.
PO7	Independent and Life-long Learning: Acquire the ability to engage in independent learning through research and lifelong learning in the broadest context of socio-technological change.
PO8	Individual and teamwork: To be in a team as a contributor for the common goal in dealing with societal issues
PO9	Self-directed and Life-long Learning: Acquire the ability to engage in independent and lifelong learning in the broadest context of socio-technological change.
PO10	Finance & Management: To have acquired the skills of managing financial and operational requirements of the project.
