On the 6th of June 2023, the Adorno Club in collaboration with the college management undertook several commendable initiatives aimed at enhancing the academic environment and facilities within the college premises.

As part of the endeavor to improve communication and information dissemination, notice boards were successfully fixed in front of each department. These boards will serve as a platform for important announcements, academic updates, and student-related information, promoting better engagement and awareness within the college community.

The efforts extended to the installation of department boards within each department. These boards have been strategically placed to showcase department-specific information. Taking a significant step towards intellectual enrichment, the Adorno Club and college management-initiated plans to establish mini libraries within various departments. These mini libraries aim to provide easy access to reference materials, journals, and relevant books tailored to the academic needs of each department. This initiative is designed to promote a culture of reading and facilitate academic research and learning.

These endeavors signify the joint commitment of the Adorno Club coordinator Ariya Thambi and the college management to create a conducive and enriched academic environment. They not only serve to enhance the infrastructure but also contribute significantly to the intellectual growth and development of both faculty and students.
